

RE: Please REJECT Socialized Health Care!

Dear [Sen./Rep.] [LAST NAME]:

I'm writing to ask you to please REJECT H.R. 3200, "America's Affordable Health Choices Act of 2009," or any other attempt to force socialized health care or government-mandated health insurance on Americans.

This plan would create rationing through government committees, force all Americans to buy over-priced, politically created health insurance, create an economically unsustainable government-run insurance plan, and impose economy-crushing taxes. More than 88 million Americans could LOSE their private, employer-based coverage. Yearly premiums for Americans with private coverage could jump as much as \$460 per person as a result of more cost-shifting. Even doctors stand to lose thousands of dollars of income under the legislation. Annual physician net income is estimated to drop by 6.3 percent or \$13.4 billion (coming in at an average \$18,900 per physician) when compared with current trends.

This is OUTRAGEOUS, and YOU must stop it. Please, do the RIGHT thing -- REJECT H.R. 3200, " America's Affordable Health Choices Act of 2009," or any other attempt to force socialized health care or government-mandated health insurance on Americans. Thank you.

Sincerely,

[YOUR NAME]
